

Security Features

		Email Security Gateway*	Integrated Email Security	Total Email Protection
Spam & Virus Filtering	Multiple spam and virus detection engines, including 3rd party and VIPRE proprietary technology.	Included	Included	Included
SPF,DKIM & DMARC	Ensuring industry best practices are followed, including SPF, DKIM and DMARC frameworks.	Included	Included	Included
Impersonation Protection	Internal domain spoofing protection to detect sophisticated phishing attacks using your own domains.	Included	Included	Included
Signature-based Threat Detection	Instant and effective protection against known malware provided by multiple signature based engines.	Included	Included	Included
Behavioural-based Threat Detection	Protection against zero-day threats utilising VIPRE's global threat intelligence network and machine learning technology.	Included	Included	Included
Link Isolation	Unparalleled protection against malicious URLs through VIPRE's proprietary DeepLink sandboxing technology, going deeper and providing more user insight than other providers.	Included	Included	Included
In-Built Phishing Education	In-the-moment Security Awareness Training for users that click on malicious links, providing training and malicious website screenshots. Content provided by Inspired e-Learning.	Included	Included	Included
Attachment, Image & QR code	Inline cloud sandboxing utilising VIPRE's Threat Analyzer technology and 30yrs of expertise in threat analysis & detection.	Included	Included	Included
Email Remediation	Clawback of malicious or nuisance emails through direct API Integration with Microsoft 365 to remove threats as they're reported.	Included	Included	Included
Data-loss Prevention	Fully customisable policies to detect and prevent malicious and accidental leakage of sensitive data.	Included		Included
Advanced Policies	Infinitely flexible and granular policy builder to enable administrators to customise email security levels and policies.	Included	Included	Included
Email Encryption	Closed-circuit outbound email encryption to protect sensitive data from email interception and unauthorised mailbox access.	Included		Included
Internal Email Scanning	Visibility and inspection of all internal emails through easy Microsoft 365 API enabled routing to allow threat scanning and policy enforcement.		Included	Included
Inline / Monitor Mode	Options to scan emails 'inline', before delivery into the user's mailbox to ensure threats don't reach their destination, or in 'Monitor' mode to allow administrator intervention post-delivery.		Included	Included
Business Email Compromise (BEC)	Protection against BEC, utilising proprietary VIPRE AI technology to identify malicious emails and detect compromised mailboxes, with no 'learning' time providing protection on day 1.		Included	Included
Advanced Social Engineering	Advanced protection against social engineering attacks, using VIPRE's powerful generative AI engines.		Included	Included
AI Attack protection	Protection against modern AI generated attacks that use LLMs to generate sophisticated and realistic phishing emails.		Included	Included
Intent Matching	Detects fraud by analyzing sender's intent, urgency, confidentiality, and other common characteristics.		Included	Included
Semantic Similarity Matching	Catches nuanced email impersonations with AI using real-world semantic comparisons.		Included	Included

Administrator tools and usability features		Email Security Gateway*	Integrated Email Security	Total Email Protection
90 Day Message Logs	90 day retention of all emails, allowing administrators to easily find and take action on emails.	Included	Included	Included
90 Day Email Replay	Ability to instantly replay emails directly to recipient's inboxes.	Included		Included
90 Day Always-on Email Continuity	End-user access to VIPRE webmail service providing crucial business continuity in the event of email disruption.	Included		Included
Outbound Relaying	Flexible outbound email routing and relay options.	Included		Included
Large Message Handling	Cloud storage for large attachments to protect mailbox limits, ensure emails get delivered and users are able to retrieve data.	Included		Included
Remote Browser Isolation	Administrator access to VIPRE's remote browser tool for risk-free inspection of suspicious and unknown websites, reducing investigation time and increasing confidence.	Included	Included	Included
Email Threat Analytics	Drill-down visibility into email threats and policy breaches for investigation and root-cause identification.	Included	Included	Included
Quarantine Reporting	90 day retention of quarantined emails with fully customisable end user reporting and quarantine management options.	Included	Included	Included

Additional Email Security Options:

VIPRE Email Archiving

A secure remote and tamperproof email archive, providing easy search and retrieve capability to meet your compliance and audit requirements, support your legal disputes and enable effective mailbox management.

VIPRE SafeSend

Prevent accidental data leaks and boost data loss awareness

by prompting users to confirm recipients, attachments and potentially sensitive data before sending.

Security Awareness Training, provided by Inspired eLearning

Build a positive security culture and manage human risk through recurring and engaging bite-sized educational content and tailored phishing simulations

About VIPRE

VIPRE is a leading provider of internet security solutions purpose-built to protect businesses, solution providers, and home users from costly and malicious cyber threats.

Our award-winning software portfolio includes comprehensive endpoint, email and web security, plus threat intelligence for real-time malware analysis, delivering unmatched protection against today's most aggressive online threats.
